Standards of proficiency for operating department practitioners
Consultation

Introduction
We are consulting on revised profession-specific standards of proficiency for operating department practitioners.

The standards of proficiency are the standards that we consider necessary for the safe and effective practice of each of the professions we regulate. We first published the standards for operating department practitioners in October 2004. We said that we would try not to make any changes for at least the first two years (during the transitional ‘grandparenting’ period) but that we would keep the standards under review and update them if necessary to take account of changes in practice.

The standards
Article 5(2)(a) of the Health Professions Order 2001 (‘the order’) says that we must:

‘...establish the standards of proficiency necessary to be admitted to the different parts of the register being the standards it considers necessary for safe and effective practice under that part of the register’

This means that we must publish standards for each of the professions that we regulate which are the ‘necessary’ or ‘threshold’ that we consider to be essential for safe and effective practice.

The standards play a central role in how someone becomes registered and remains registered with us.

We approve education programmes to make sure that they allow students to meet these standards when they graduate. We also assess applications from applicants who have trained outside of the UK and some applications via our grandparenting process against these standards. If an applicant meets these standards they are eligible to be registered.

If a registrant’s competence is called into question we will look at these standards in deciding whether we need to take any action.

Every time a professional registered with us renews their registration, we ask them to sign a declaration to confirm that they continue to meet the standards of proficiency which apply to them.
Generic standards
The standards are divided into generic standards which apply to all of the 13 professions we currently regulate and standards individual to each profession (profession-specific standards). The generic standards of proficiency are not the subject of this consultation.

We consulted on revised standards for the first 12 professions we regulated between October 2006 and February 2007. This included changes to the generic standards which will apply to all the professions, including operating department practitioners. The new standards were agreed by our Council in May 2007 and became effective for the first 12 professions on 1 November 2007.

When the profession-specific standards for operating department practitioners are published following this consultation, these new generic standards will apply at that time.

Reviewing the standards of proficiency for operating department practitioners
In June 2007 we held a meeting with representatives from professional bodies and associations representing operating department practitioners, and members of our Education and Training Committee. As part of the meeting, we considered whether the existing standards needed to be amended or whether any additional standards were necessary.

We would like to thank the following for their input at the meeting:

<table>

</tr>
<tr>
<td>Eileen Thornton</td>
<td>Alternate physiotherapist member of the HPC Council and Chair of the Education and Training Committee</td>
</tr>
<tr>
<td>Jane Wardle</td>
<td>College of Operating Department Practitioners</td>
</tr>
</tbody>
</table>

The changes agreed at that meeting are put forward in this document. The changes proposed are relatively minor in nature and are to:

- reflect standard safe and effective operating department practice;
- reflect the standard content of pre-registration education programmes;
- clarify the intention of the existing standards; and to
- correct any existing errors.
Your responses

We would welcome your comments about the standards in whatever format is convenient for you. However, you might wish to address the questions below:

1. Do you agree with the changes we have made to the existing standards?
2. Do you think any additional standards are necessary?
3. Do you think there are any standards which might be reworded?

This consultation will put the Council’s proposed standards before a wide range of stakeholders, including professional bodies, employers, higher education institutions and others with an interest in our work. We would like to invite any individual or organisation with an interest in these issues to respond to this consultation. The consultation will run until Friday 7 March 2008.

If you would like to respond to this consultation, please send your response to:

Standards of proficiency consultation – operating department practitioners
Policy and Standards Department
Health Professions Council
Park House
184 Kennington Park Road
London

Email: consultation@hpc-uk.org
Website: www.hpc-uk.org/aboutus/consultations

We will publish on our website a summary of the responses we receive, and the decisions we have taken as a result.

If you would prefer your response not to be made public, please indicate this when you respond.

We look forward to receiving your comments.

Yours faithfully

Eileen Thornton
Chair of the Education and Training Committee
Standards for operating department practitioners

**Key:**

*In this document:*

The generic standards are shown in black type

The profession-specific standards are shown in *black italicised type*

Deleted words or standards are shown in black or *black italicised type* struck-through

New standards or additional wording is shown in **bold italicised type**
Registrant operating department practitioners must:

1a.1  
be able to practise within the legal and ethical boundaries of their profession  
- understand the need to act in the best interests of service users at all times  
- understand what is required of them by the Health Professions Council  
- understand the need to respect, and so far as possible uphold, the rights, dignity, values and autonomy of  
  every service user including their role in the diagnostic and therapeutic process and in maintaining health and  
  wellbeing  
- be aware of current UK legislation applicable to the work of their profession  
  - *be able to practise in accordance with relevant medicines legislation*  

1a.2  
be able to practise in a non-discriminatory manner

1a.3  
understand the importance of and be able to maintain confidentiality

1a.4  
understand the importance of and be able to obtain informed consent

1a.5  
be able to exercise a professional duty of care

1a.6  
be able to practise as an autonomous professional, exercising their own professional judgement  
- be able to assess a situation, determine the nature and severity of the problem and call upon the required  
  knowledge and experience to deal with the problem  
- be able to initiate resolution of problems and be able to exercise personal initiative  
- know the limits of their practice and when to seek advice or refer to another professional  
- recognise that they are personally responsible for and must be able to justify their decisions

1a.7  
recognise the need for effective self-management of workload and resources and be able to practise  
  accordingly
| 1a.8 | understand the obligation to maintain fitness to practise  
- understand the need to practise safely and effectively within their scope of practice  
- understand the need to maintain high standards of personal conduct  
- understand the importance of maintaining their own health  
- understand both the need to keep skills and knowledge up to date and the importance of career-long learning |
<table>

<tr>
<th>Professional relationships</th>
</tr>
</thead>
</table>
| **1b.1** | be able to work, where appropriate, in partnership with other professionals, support staff, service users and their relatives and carers  
- understand the need to build and sustain professional relationships as both an independent practitioner and collaboratively as a member of a team  
- understand the need to engage service users and carers in planning and evaluating diagnostics, treatments and interventions to meet their needs and goals  
- be able to make appropriate referrals |
| **1b.2** | be able to contribute effectively to work undertaken as part of a multi-disciplinary team  
- **be able to use effective communication skills when sharing information about patients with other members of the multi-disciplinary team** |
| **1b.3** | be able to demonstrate effective and appropriate skills in communicating information, advice, instruction and professional opinion to colleagues, service users, their relatives and carers  
- be able to communicate in English to the standard equivalent to level 7.0 of the International English Language Testing System, with no element below 6.5  
- understand how communication skills affect the assessment of service users and how the means of communication should be modified to address and take account of factors such as age, physical ability and learning ability  
- be able to select, move between and use appropriate forms of verbal and non-verbal communication with service users and others  
- be aware of the characteristics and consequences of non-verbal communication and how this can be affected by culture, age, ethnicity, gender, religious beliefs and socio-economic status  
- understand the need to provide service users (or people acting on their behalf) with the information necessary to enable them to make informed decisions  
- understand the need to use an appropriate interpreter to assist service users whose first language is not English, wherever possible  
- recognise that relationships with service users should be based on mutual respect and trust, and be able to maintain high standards of care even in situations of personal incompatibility |

</thead>
</table>
| **2c.1**  | be able to monitor and review the ongoing effectiveness of planned activity and modify it accordingly  
  - be able to gather information, including qualitative and quantitative data, that helps to evaluate the responses of service users to their care  
  - be able to evaluate intervention plans using recognised outcome measures and revise the plans as necessary in conjunction with the service user  
  - recognise the need to monitor and evaluate the quality of practice and the value of contributing to the generation of data for quality assurance and improvement programmes  
  - be able to make reasoned decisions to initiate, continue, modify or cease treatment or the use of techniques or procedures, and record the decisions and reasoning appropriately |
| **2c.2**  | be able to audit, reflect on and review practice  
  - understand the principles of quality control and quality assurance  
  - be aware of the role of audit and review in quality management, including quality control, quality assurance and the use of appropriate outcome measures  
  - be able to maintain an effective audit trail and work towards continual improvement  
  - participate in quality assurance programmes, where appropriate  
  - understand the value of reflection on practice and the need to record the outcome of such reflection  
  - recognise the value of case conferences and other methods of review |
