MANAGEMENT ACCOUNTS FOR THE 7 MONTHS ENDED 31ST OCTOBER 2002

The Management Accounts will be tabled at the meeting, as will a summarised analysis of the DoH funded expenditure to date (to be filed in the Private Section of your agenda binder).

The Accounts are unlikely to show any adverse trends. In fact some of the Provision for Unrealised Losses on Disposals of Investments may be released as the Stock Market rallied slightly in October.

(The accounts have been delayed as the Management Accountant, Richard Ballard, is currently taking an exam but will return in good time to finish this work prior to the Meeting).

Management Accounts
For the 7 months ended 31st October 2002

MANAGEMENT ACCOUNTS FOR THE 7 MONTHS ENDED 31st OCTOBER 2002

COMMENTARY

INTRODUCTION

The October Accounts show an Operating Surplus of £2,749 against a budgeted deficit of £280,158, a favourable variance of £282,907.

These accounts show the Provision for Unrealised Losses on Investments deducted from the Operating Surplus. The provision has now decreased to £350,603 from £445,332 last month. This provision in turn reduces the result to an overall deficit of £347,854 against a budgeted one of £280,158, an adverse variance of £67,696.

Our core income remains down on budget by £40,144 (1.75% adverse variance). Budgeted increased numbers have yet to affect positively the financial figures, but are gradually catching up as each profession pays its subscription. This is a spin-off from our change in policy of spreading income over the registration year rather than taking credit for income on a cash basis.

Most departments show overhead savings. These savings currently total £329,691.

Financially the core business operation is sound but the investment situation continues to have a marked effect. However we are ensuring that our fund managers continue to adopt a very conservative approach at this time, with higher than normal liquidity.

INCOME

Income from the professions is down on budget (£40,144) due to retention fees being lower than budget. Individually some of the professions are up on budget, some down. Most of those up have more grandparenting income than was originally thought. There are no specific reasons for those with adverse variances but it is important to note that the fee income has been budgeted month by month in 12ths. (Next year we will have established a pattern which can be used for more "scientific" month by month budgeting.)

The Department of Health Grant of £2,000,000 has been budgeted on a 1/12th basis but the expenditure is volatile and to date there has been a revenue spend of £1,082,014 and a debtor brought in for any grant not yet received. Capital Expenditure of £355,897 (Building Refurbishment and Registration Computer System) to be funded by grant has been expensed in the Balance Sheet. Under accounting rules the grant receivable is held as a credit in the balance sheet and is used to fund the depreciation of the capital expenditure in due course. We have been invoicing the DoH on a monthly basis and the balance for the last month is included in debtors on the Balance Sheet.

Investment Income has been discussed above. Portfolio investment income was up on budget by £8,284 but pressures on our cash flow occasioned by expenditure available for DoH grant being spent prior to the receipt of the grant mean that bank interest is below budgeted levels. Coupled with some realised losses, investment income excluding unrealised losses is showing an adverse variance of £6,640.

EXPENDITURE

Total operating expenses are £2,356,411 against a budget of £2,686,102, a favourable variance of £329,691. The DoH funded revenue expenditure totals £1,082,014. Most departments are showing savings against budget after seven months, with the Chief Executive's department & Operations (International Registration temporary staff) being the only exceptions.

The Overhead Total pages (5-7) show that most overhead groupings are within budget. Payroll costs show savings of £14,632 after seven months. Pension costs continue to be substantially under budget as not all those eligible to join the scheme have done so. Temporary staff has a significant adverse variance largely due to additional requirements in the international registrations department. Staff travelling and subsistence has a favourable variance of £13,370 and Council and Committee Expenses show savings of £155,852 at this time (the budget was taken at the "worst possible scenario" basis of everyone attending everything).

Property Services shows a saving of £15,305 mainly due to an underspend on routine repairs and maintenance, Office Services shows an overspend of £13,034 largely due to printing & stationery costs, Computer Services shows an overspend of £17,954 due to internet development and Specific Departmental Expenses a saving of £35,603.

Committees and Working Groups shows a significant saving of £125,917. This is due to a combination of items. Travel and subsistence for the old boards was included here and, even though they were disbanded, expenditure was budgeted for as similar meetings would still take place. JVC costs are showing a £30,736 favourable variance. The increase of assessors' fees to £60 will use up some of this favourable variance.

BALANCE SHEET

Fixed Assets reflects the capital expenditure connected with the building and computerisation work. There is an equal amount in creditors to match the capital expenditure to reflect the capital grant receivable, which will be released to match the depreciation of the new fixed assets, which will commence when each project has been completed. The Investments show the weakened position since the end of March, but an improvement since September.

Reserves now stand at £2,068,761.

CONCLUSION

After seven months of the financial year, operating expenses are under control and show a favourable variance against budget. The overall deficit is made up mainly by the unrealised losses on the investment portfolio, reflecting current stock market conditions. There are no serious or unexplained adverse variances in overheads.
