Programme name	Conversion Course From Supplementary to Independent Non- Medical Prescribing (Non-Accredited)
Mode of delivery	Part time
Relevant entitlements	Independent prescribing Supplementary prescribing
Name of HCPC visitors and visitor role	Gordon Burrow (Chiropodist / Podiatrist)
	Rosie Furner (Independent prescribing)
HCPC executive	Abdur Razzaq
Date of submission to the HCPC	7 August 2014

Section two: Executive summary

The Health and Care Professions Council (HCPC) approve education programmes in the UK which health and care professionals must complete before they can apply to be registered with us.

As well as approving educational programmes for individuals who want to join the Register, the HCPC approve programmes for those already on the Register. Along with several other entitlements, we currently approve programmes to allow:

- chiropodists / podiatrists, radiographers and physiotherapists to have their registration record annotated with supplementary prescribing; and
- chiropodists / podiatrists and physiotherapists to have their registration record annotated with independent prescribing.

We have previously ensured that a currently running supplementary prescribing programme at this education provider has met the standards of education and training (SETs). As this new or amended programme is based on an existing HCPC approved supplementary prescribing programme, we can be satisfied that it meets some of the standards for prescribing, which are based on the SETs. However, we have identified some standards where we will need to make a judgement about how the introduction or modification of elements of the programme impact on the way it meets these standards.

To recommend a programme for approval, the visitors must be assured that the programme meets the standards for education providers part of the standards for prescribing, and that those who complete the programme demonstrate an ability to meet the standards for all prescribers (along with the additional standards for independent prescribers where required).

Section three: Submission details

The following required documents were provided as part of the submission:

- Information for applicants (eg advertising materials, admissions / entry criteria)
- Programme specification
- Student handbook
- Information about programme and management team structure, including staff CVs
- Module descriptors
- Extracts from practice placement documents
- Extracts from assessment regulations relating to student progression and external examiners
- Standards for prescribing mapping document

Section four: Additional documentation

	The visitors agreed that no further documentation was required in order to make a recommendation.		
	The visitors agreed that additional documentation was required in order to make a recommendation. The standards for which additional documentation is requested are listed below with reasons for the request.		
Section five: Recommendation of the visitors			
The v	risitors agreed to recommend to the Education and Training Committee that:		
	There is sufficient evidence to show the programme meets the standards for education providers part of the standards for prescribing, and therefore that the programme be approved		
	There is insufficient evidence to determine if or how the programme meets the standards for education providers part of the standards for prescribing.		

Therefore, a visit is recommended to gather more evidence, and if required place conditions on approval of the programme

Section six: Visitors' comments

The visitors noted that there were some inaccuracies within the documentation in regards to references to the HCPC's former name, the 'Health Professions Council' (HPC). The visitors also noted inconsistent use of the term DMS (supervisor) rather than DMP on page 18 of student handbook. Visitors advise the programme team may wish to consider proof reading throughout the documents to eliminate any layout issues and inaccuracies. The visitors therefore suggest that the programme team update their documentation to ensure that the terminology in use is accurate, consistent and reflective of the language associated with statutory regulation and of the current programme.
